**Roche CEO Thomas Schinecker**: "Roche's strong growth momentum continued in the second quarter, driven by the strong growth of 11% at constant exchange rates in our Pharmaceuticals Division.

We received numerous important approvals and reported positive data in disease areas with high unmet medical need.

Over the past six months, we have made significant progress in our pipeline and advanced four potentially practice-changing therapies into the final phase of clinical development, based on encouraging data: NXT007 in haemophilia A, trontinemab in Alzheimer's disease, prasinezumab in early-stage Parkinson's disease, and zosurabalpin, a novel antibiotic that could become the first in over 50 years to tackle a type of bacteria that has become resistant to most other treatments.

We are confident in our continued strong momentum and resilience of our business due to our innovative on-market portfolio and pipeline.

Based on these strong results, we confirm our full-year outlook."

## **Group results**

In the first half of 2025, Roche achieved **sales** growth of 7% (4% in CHF) to CHF 30.9 billion due to strong demand for pharmaceutical products.

**Core operating profit** increased by 11% (6% in CHF) to CHF 12.0 billion, driven by higher sales and effective cost management.

The appreciation of the Swiss franc against most currencies, notably the US dollar, had an adverse impact on the results when reported in Swiss francs compared to constant exchange rates.

Core earnings per share increased by 12% (8% in CHF).

**IFRS net income** increased by 23% (17% in CHF) to CHF 7.8 billion, driven by the strong operating performance and lower impairment charges related to intangible assets.

Sales in the **Pharmaceuticals Division** increased by 10% (6% in CHF) to CHF 24.0 billion, with medicines for severe diseases continuing their strong growth.

The top five growth drivers – Phesgo, Xolair, Hemlibra, Vabysmo and Ocrevus – achieved total sales of CHF 10.6 billion. This represents an increase of CHF 1.7 billion at CER compared to the first half of 2024.

This more than compensated for the total decrease of CHF 0.3 billion (CER) in sales of the 'loss of exclusivity (LOE)' products – the decline in sales of Avastin (various types of cancer), Herceptin (breast and gastric cancer), MabThera/Rituxan (blood cancer, rheumatoid arthritis), Lucentis (severe eye diseases) and Esbriet (lung disease) was partially offset by an increase in sales of Actemra/RoActemra (rheumatoid arthritis). In the **United States**, sales rose by 10% due to continued growth of Xolair and continuing uptake of Hemlibra, Ocrevus, Vabysmo and Phesgo. This growth more than compensated for the decline in sales of medicines with expired patents.

Sales in **Europe** grew 5% as the continued roll-out of Vabysmo and the continuing uptake of Ocrevus, Polivy and Phesgo more than compensated for lower sales of Perjeta (breast cancer) due to ongoing conversion of patients to Phesgo and the impact of biosimilar competition on Actemra/RoActemra sales.

In **Japan**, sales increased by 5%, mainly due to the strong uptake of Phesgo, Vabysmo and PiaSky (paroxysmal nocturnal haemoglobinuria). Sales growth was partially offset by the decline in sales of Perjeta due to continued conversion of patients to Phesgo and of Avastin because of biosimilar erosion.

Sales in the **International** region grew by 14%, led by Phesgo, Hemlibra, Xofluza (influenza), Vabysmo and Elevidys (Duchenne muscular dystrophy). In China, sales rose by 9%, driven by the uptake of Phesgo, strong sales of Xofluza and the roll-out of Polivy and Vabysmo.

The **Diagnostics Division's** sales remained stable (-3% in CHF) at CHF 7.0 billion as growth in demand for pathology solutions and blood screening tests offset the impact of healthcare pricing reforms in China.

Sales in the **Europe, Middle East and Africa (EMEA)** region increased by 5%, driven by higher sales of clinical chemistry and immunodiagnostic products. In **North America**, sales increased by 6%, with growth across customer areas. Sales in **Asia-Pacific** decreased by 15% due to healthcare pricing reforms in China. **Latin America** sales grew by 14%.
